"Tanks" Not New.

An Irvington professor saw nothing new in some of the machinery of the world war now employed on the western battle line.

"Ancient Carthage," said the professor, "used 'tanks.' They differed from the modern tanks in being all alive. These were the elephants which carried castles on their backs filled with fighting men. Protected by armor, these ancient tanks were invulnerable. Thrown against infantry in the open field, no troops could stand against them. When they attacked fortified camps they broke down the palisades, overturned everything and scattered the enemy in a panic. At the battle of Zama, Scipio, to evade the elephant tank danger, ordered that when the monsters charged they should be hamstringed. No German commander has as yet ordered the modern tanks to be hamstringed."—Indianapolis News.

Now the Modern Circuit Rider.

The old type of circuit rider in a new guise is coming back. He will return to do church duty in the Spokane country, but will not be known as "circuit rider." He will be "convention pastor" and in place of the saddle horse of his old-time model, will use the passenger coaches or perchance, will be chauffeur of his own automobile.

The plan is being inaugurated by Dr. A. H. Bailey, superintendent of Baptist missions, says the Spokane Chronicle, and the duty of the "convention pastor" will be to assist weak churches and look after neglected and undeveloped fields.

In Danger.

Friend (to professor, whose lecture "How to Stop the War," has just been concluded)—Congratulate you, old man—went splendidly. At one time during the afternoon I was rather anxious for you.

Professor—Thanks. But I don't know why you should have been so concerned on my behalf.

Friend—Well, a rumor did go round the room that the war would be over before your lecture.—London Punch.

Human Nature.

If the law were to edict that man and wife should never be together for more than six months in the year it would be broken every day, says W. L. George in the Atlantic Monthly, and men and women would stand hunger and stripes to come together for 12 months in 12; if love of home were made a crime a family life would arise more touching than anything Queen Victoria ever dreamed.

Expert.

"I don't see how you do it." "Why not?" responded the fortune teller. "We can figure what goods the people come after just as well as any dry goods clerk."

At Short Range.

Ernie—I broke 99 pigeons out of a possible 100 at the Gun club this morning.

Jack—Howja do it? With a stick?

Ernie—Naw; I dropped a box of 'em.
